Court Sends Case File Destruction/Purge Notification (TRK901)

Exchange Description

A trial court uses this NIEM-based data exchange to send a case file destruction/purge notification to an integration partner when the trial court:

- Destroys the physical case file, but leaves the electronic case information in CCMS.
- Purges the electronic case information from CCMS as well as destroys the physical case file.

The notification message sent by the trial court to the integration partner contains the case destruction/purge information (e.g., CCMS case number, case destruction/purge indicator, authorizing party).

No response message is sent by the integration partner upon successful receipt of the notification message. Successful delivery of the notification message is assumed unless an error in delivery or processing by the integration partner occurs.

Business Response Exchanges

The business response refers to any subsequent exchanges that may occur as a direct result of this exchange, as follows:

- There is no business response to this exchange.

Error Handling

If the integration partner does not successfully receive and process the incoming message, the trial court will receive an error message with an error code and error reason.

PROBABLE INTERESTED INTEGRATION PARTNERS

- County sheriff
- Probation—adult

RELATED EXCHANGES

Related data exchanges are any preceding or subsequent data exchanges that may be used by an integration partner as part of the overall business process related to this exchange.

- There are no related exchanges.

For more information about this and other data exchanges, contact integrationpartners@jud.ca.gov

Additional Information

- A single exchange message is sent for each case file destruction/purge notification.
- The response to this message only occurs after receipt and processing by the trial court. The only allowable response to this exchange is an error message. The error response message must be sent as a separate message using the error format defined in this exchange.
